

REMARKS

The claims have been amended to more clearly define the invention as disclosed in the written description. In particular, claims 1, 4 and 5 have been amended for clarity.

The invention as claimed in amended claims 1, 4 and 5 is supported in the Substitute Specification on page 4, paragraph [0010] and pages 8-9, paragraph [0027]. In particular, the video lines in the video signal are applied to the display lines in a first display field for a first period of time lasting longer than a video field period of the video signal, and then to the display lines in a second display field for a second period of time lasting longer than the video field period of the video signal. As described in the Substitute Specification in paragraph [0027], the first and/or second period of time may be one hour, or the amount of time that the display is active.

Applicant believes that the above changes answer the Examiner's 35 U.S.C. 112, paragraph 2, rejection of the claims, and respectfully requests withdrawal thereof.

Applicant believes that this application, containing claims 1-5, is now in condition for allowance and such action is respectfully requested.

Respectfully submitted,

by 
Edward W. Goodman, Reg. 28,613
